2ND ANNUAL ECHO COURSE IN CONGENITAL HEART DISEASE INTERNATIONAL

ADULT CASES INCLUDING MULTIMODALITY IMAGING

6-8 NOVEMBER 2026

HIPPOCRATION GENERAL HOSPITAL OF ATHENS

WELCOME MESSAGE

Dear Colleagues,

It is our great pleasure to welcome you to the 2nd Annual International Echocardiography Course in Adult Congenital Heart Disease, jointly organized by the 1st Department of Cardiology, Hippokration General Hospital, National and Kapodistrian University of Athens, and the Adult Congenital Heart Disease and Echocardiography Departments of Royal Brompton Hospital, London.

This international course has been designed to provide a comprehensive and practical approach to echocardiographic imaging in adults with congenital heart disease. Bringing together internationally recognized experts in congenital cardiology and cardiovascular imaging, the program offers an outstanding opportunity to exchange knowledge, discuss challenging clinical cases and explore the latest developments in the field.

Echocardiography remains the cornerstone of diagnosis and lifelong follow-up in adults with congenital heart disease, while advances in multimodality imaging, structural interventions and multidisciplinary care continue to reshape clinical practice. Through a combination of state-of-the-art lectures, interactive case discussions, live image interpretation and dedicated hands-on workshops, this three-day course aims to bridge scientific knowledge with everyday clinical practice.

Beyond its educational mission, we hope this meeting will foster collaboration, encourage the exchange of ideas and strengthen the international network of professionals dedicated to the care of adults with congenital heart disease.

We are delighted to welcome you to Athens and wish you an inspiring and enjoyable scientific meeting.
